

Leandro Hernán Buchter

Backend & Automation Engineer | Crypto Data · APIs · AI

Buenos Aires, Argentina (UTC-3, remote) · itech.lca@gmail.com

linkedin.com/in/leandrobuchter · github.com/LCAITECH · portfolio.lcaitech.com

Summary

Backend and automation engineer with 10+ years in IT (since 2015) and in crypto since 2020. I build end-to-end systems in Python: exchange and market-data API integrations, data pipelines, PostgreSQL databases, REST APIs, Telegram bots and AI agents, deployed with Docker on Linux and GCP. Solid infrastructure background (servers, virtualization, networking) and first-hand knowledge of how exchanges, DeFi and trading communities work.

Technical Skills

Backend & Data: Python, FastAPI, SQL / PostgreSQL, REST API design, webhooks, data pipelines, pytest

Crypto: Exchange APIs (MEXC, BingX), spot & perpetual futures, market data, DeFi (launchpools, yield farming), Telegram bots

AI & Automation: LLMs, AI agents, model routing, Make

DevOps & Cloud: Docker, Linux / Ubuntu, systemd, Google Cloud (GCP), Git / GitHub

Infrastructure: Windows Server, VMware, Hyper-V, HPE ProLiant, TCP/IP networking, Microsoft 365

Professional Experience

Founder & Lead Engineer — LCA ITECH

2022 – Present

Crypto technology and automation brand (registered trademark, INPI Argentina) · Buenos Aires, remote

- Design, build and operate in-house crypto data products end to end — API design, data pipelines, PostgreSQL storage and deployment on GCP (see ATH Intelligence below).
- Develop Python Telegram bots and automations for live market data, alerts and community operations.
- Since 2022, built and run a crypto trading community across Telegram, X, YouTube and Discord: market analysis, educational content and tooling for members.
- Hands-on with centralized exchanges (BingX, MEXC): spot and perpetual futures, fee structures and referral systems; secured the community's first exchange partnership with BingX.
- Co-run **ARDC – Alto Riesgo Degens Club** (ardc.club), a memecoin trading community, together with a partner.

Independent Automation & AI Consultant

Mar 2025 – Present

- Design and implement process automation for clients using Python and AI (LLM-based assistants and agents).
- Build integrations between APIs, cloud services and business platforms (REST, webhooks, Make).
- Set up and maintain the infrastructure these automations run on (Linux, Docker, cloud).

Independent Crypto & DeFi Activity

2020 – Present

- Hands-on in crypto markets and DeFi since 2020: Binance launchpools, yield farming on Beefy, spot and perpetual futures — the experience that led to founding LCA ITECH in 2022.

IT Support & Infrastructure Specialist — Río Informática

Oct 2015 – Oct 2020

- Provided on-site and remote L1/L2 support to corporate clients, resolving hardware, software and connectivity incidents.
- Deployed, configured and maintained **HPE ProLiant** servers, **Windows Server**, **VMware** and **Hyper-V** environments.
- Administered client networks, Microsoft 365 and video-conferencing; ran OS migrations and implemented backup and business-continuity solutions.
- Performed advanced hardware diagnostics, data recovery, preventive maintenance and warranty (RMA) management.

Projects

ATH Intelligence — athintelligence.pro (live)

Python · FastAPI · PostgreSQL · Docker · GCP

API-first crypto market intelligence platform with its own historical database.

- Own REST API with documentation, backed by a self-built historical database (PostgreSQL/SQL).
- Data pipelines that collect, normalize and store market data from multiple sources.
- Analytics: ATH distance and supply-adjusted ATH, Recovery Score, token unlock context, Fear & Greed.
- Modular architecture separating API, business logic and data processing.

LCA ITECH Demo Bot — t.me/lcaitech_demo_bot · open source: github.com/LCAITECH/lcaitech-demo-bot

- Python Telegram bot with live prices, ATH distance, Fear & Greed, large-trade (whale) detection on MEXC and an FAQ assistant.
- Deployed on GCP with systemd and Docker.

Model Compass — open source: github.com/LCAITECH

Python · FastAPI · pytest

- Open-source tool for comparing AI models and routing requests between them; FastAPI service with a pytest test suite.
